PROFILE

React Native developer in Karachi, shipping iOS and Android apps for founders worldwide. Over the last five years I've delivered 50+ projects and 100K+ app downloads — a location-based social app, an offline AI document scanner, a restaurant ordering suite, an Islamic inheritance calculator — mostly solo, in React Native and TypeScript, and always through to a live store listing. My sweet spot is taking an early-stage idea through architecture, motion, Firebase wiring, payments and store submission.

EXPERIENCE

Senior React Native Developer

2019 – NOW

Freelance · remote from Karachi, Pakistan · via direct clients, Fiverr, CodeCanyon

- Completed 50+ mobile app projects for international clients, from first architecture to live App Store and Play Store listings
- Shipped a location-based social app with 10K+ Play Store installs, rated 4.6
- Built and sold React Native templates on CodeCanyon with active sales
- Five-star ratings across Fiverr, CodeCanyon and direct client work
- Deep Firebase integration, real-time features, GPS and payments (Stripe, RevenueCat)

Independent Mobile Developer

2018 – NOW

Self-directed products · via Play Store, Chrome Web Store, GitHub

- Publish and maintain my own apps on Google Play and a Chrome extension on the Chrome Web Store
- Published multiple React Native templates on the CodeCanyon marketplace
- Open-source contributions across React Native and the JavaScript ecosystem
- Weekly UI reels and tutorials for the React Native community, plus 27 free developer tools on anwersolangi.com

STACK

Mobile engineering

React Native & Expo
5+ years, 50+ shipped apps

TypeScript & modern JavaScript
typed, maintainable codebases

Reanimated & Gesture Handler
60fps motion and gestures

React Navigation & deep linking
auth flows, tabs, universal links

Native modules
Swift / Kotlin bridges

Backend & realtime

Firebase
Auth, Firestore, FCM, Cloud Functions

Node.js & REST APIs
pragmatic backends for mobile

GraphQL & Socket.io
live data, chat, presence

MongoDB
document modelling for app data

Stripe & RevenueCat
subscriptions and checkout

Shipping & tooling

Fastlane · TestFlight · Play Console
automated release pipelines

CodePush
over-the-air updates

Git, GitHub & CI
reviews, branching, checks

Jest & Detox
unit and end-to-end testing

Figma
design handoff, motion specs

Also: Redux / MobX, Lottie, push notifications, MMKV, React Native Paper, Next.js, Chrome Extension APIs, Xcode, Android Studio, Postman.

SELECTED WORK

Nearby

LOCATION-BASED SOCIAL

GPS-driven discovery and real-time chat. Built solo in React Native with a Firebase backend and Stripe payments.

10K+ installs · 4.6 on Play Store · React Native · Firebase · Stripe

TapMeal

RESTAURANT SAAS · QR

A three-app restaurant suite on one Firebase backend: customers order by QR with no install; owners run orders, kitchen and staff live from their phone.

Live on Play Store · React Native · Next.js · Firebase · TypeScript

DocuLensAI

AI DOCUMENT SCANNER

Auto edge detection, on-device OCR and one-tap PDF, image and text export. Every scan runs entirely on the phone — no cloud, no account.

100% offline · VisionCamera + OpenCV · ML Kit OCR · SQLite

Wasiyyah

ISLAMIC WILL & FARAID

A guided Shariah-compliant will builder on a 2,000-line pure-TypeScript faraid engine: exact fractions across 8 madhabs, 10 languages with RTL, formal PDF export.

8 madhabs · 10 languages · Expo · TypeScript · Encrypted MMKV

MemorIQ

MEMORY GAME

A memory-match brain trainer with 9 themes, animated backgrounds, lives and per-round timers, offline-first. Sold on CodeCanyon, rebrandable from one config file.

9 themes · Reanimated · MMKV · TypeScript

YouTube Focus

CHROME EXTENSION

Blocks accidental keystrokes while YouTube or YouTube Kids is fullscreen, so a stray keypress can’t pause, skip or exit. Free and open source.

Chrome Web Store · JavaScript · Chrome APIs

ALL 10 APPS → ANWERSOLANGI.COM/APPS

EDUCATION

Self-taught developer. Continuous learning through documentation, courses and shipping real products — focused on React Native, mobile and the modern JavaScript ecosystem.
